

ATC Concept 2

Price: \$11,000

www.atc.gb.net

The smallest Active system in ATC's ever-expanding pro/consumer line, the biamplified Active 10s/C4c combination is a stunning avant-garde industrial design, built like a bomb shelter. Sonics are vibrant and dynamics unalloyed, belying the modest size of these compact two-ways. The Concept 2s offer wide dispersion in multichannel and a continuous transparent curtain of sound, and are an epitome of grace, refinement, and accuracy in a small package, with one of the most purely musical subwoofers around. A premium small multichannel system.
