Following the introduction of our phase-stable insulation (Taylon®) via our flagship, no-compromise ChordMusic range, it became clear that we could also offer a simpler range of cables but still use the Taylon® dielectric. The Sarum T cable range was the result. This replaced the previous Sarum range. The musical improvements were so marked that we felt it was important to offer this Taylon® upgrade to our existing Sarum owners. To this end we are operating an upgrade scheme in conjunction with our retailers.</p> <p>In terms of musical performance, the Sarum T is much closer to ChordMusic than the previous Sarum range. It highlights how sensitive human hearing is to phase. The Sarum T is highly shielded but not to the same "no compromise" extent used with ChordMusic. This allows us to pass on significant savings to the music lover. At this level of performance we recommend arranging a demonstration (at your nearest Chord Company Sarum T retailer) to hear the difference that this range of cables can make to your enjoyment. If you are fortunate enough to already own one of our Sarum cables, please take it with you to enable a direct comparison, before arranging an upgrade.</p>	m adicional	1.156,00 €
